

VACUFLO® CENTRAL VACUUM SYSTEMS:

the answer for clean indoor air

Creating a healthy home environment for your family is important. According to the U.S. EPA, indoor air pollution is America's most serious environmental health problem. The American College of Allergists also reports that 50% of all illnesses are caused by, or aggravated by, polluted indoor air. No wonder indoor air quality is one of the top priorities for today's homeowners!

VACUFLO Central Vacuum Systems can help improve indoor air quality by capturing 100% of all vacuumed dirt, dust and allergens with no recirculation of particles back into the living area.

Leading organizations are talking about the health benefits of central vacuums like VACUFLO:

“Using central vacuum systems that are vented to the outdoors can significantly reduce dust mites, pollens, animal dander and other allergy causing agents.”

–US EPA

“Allergy sufferers’ symptoms can be improved up to 61% when using a central vacuum system.”

–University of California Davis School of Medicine

“Central vacuum systems are among the best indoor air quality investments for your home.”

–BUILDER Magazine

“The healthiest type of vacuum to operate is a central vacuum that is vented outdoors.”

–The Healthy Home Institute

Dirt makes a clean exit

VACUFLO features Cyclonic Filtration Technology® (CFT™), a unique filtration method that ensures maximum vacuum power every time. With CFT dirt, dust and allergens make a clean exit from your home.

VACUFLO®: *the green choice*

Today's environmentally conscious homeowners are demanding and getting improved energy efficiency, better indoor air quality and smarter use of building materials. These "green" building initiatives not only protect the environment, but also improve comfort and boost home value.

Organizations like Earth Advantage®, Environments for Living®, and the US Green Building Council with its LEED®, (Leadership in Energy and Environmental Design) Rating System are providing standards and certification to ensure that best practices are followed across the country.

Central Vacuum Systems have a unique role to play in "green" homes. By removing 100% of vacuumed dirt and dust, they ensure healthy indoor air and reduce the discomfort of allergy sufferers by more than 60%. VACUFLO Systems also offer these benefits:

All you discard is the dust

Unlike uprights, which are often discarded after only a few years, VACUFLO Central Vacuum Systems keep up worry-free cleaning for decades. A Limited Lifetime Warranty ensures it.

No additional electricity

VACUFLO offers turbine-powered powerheads. Turbines run off the airflow of your central vacuum system so they require no additional electricity to operate.

Say NO to noise pollution

VACUFLO features sound-dampening designs that keep homes peacefully quiet. There's never been a quieter, more powerful combination than VACUFLO Central Vacuum Systems and Turbine Powerheads.
